

MD. RAISUL ISLAM

Software Engineer

• +880 1812613387 • r072islam@gmail.com • Github • Portfolio • LinkedIn

SUMMARY

Backend Engineer specializing in **Python/Django** and **PHP/Laravel** stacks with a strong focus on architecting secure, high-performance **REST APIs**. Proven expertise in API optimization, **PostgreSQL** and **MySQL** query refinement, and **Docker** containerization. Skilled in deploying scalable systems on **AWS** and **Render**, with a commitment to writing clean, maintainable code for full-stack applications.

EXPERIENCE

Backend Developer

Noetic IT

📅 October 2022 – October 2023

A technology firm focusing on software solutions and digital services

- Enhanced REST APIs, reducing response times and boosting overall system performance
- Optimized PostgreSQL queries, minimizing load times and improving database efficiency
- Implemented JWT and OAuth authentication for secure access management
- Introduced Docker containerization to streamline and standardize the deployment process

Part-Time Web Assistant

PaperArt

📅 March 2021– April 2022

A business providing creative solutions and design services

- Customized templates with HTML, CSS, and JavaScript to improve usability
- Resolved frontend issues to enhance load speeds across devices
- Optimized images and assets to boost site performance
- Collaborated with senior developers to gain hands-on experience in web application customization

EDUCATION

Bachelor of Science in Computer Science & Engineering (CSE)

United International University (UIU)

📅 March 2018 – November 2022

Higher Secondary Certificate (HSC)

Dhaka Residential Model College

📅 January 2014 – May 2016

SKILLS

- **Programming & Frameworks:** PHP, Laravel, Python, Django, Django REST Framework, JavaScript, HTML, CSS;
- **Database & APIs:** PostgreSQL, SQL, REST, JWT, OAuth;
- **DevOps & Tools:** Docker, Git, GitHub, Postman;
- **Other:** Microsoft Office, Canva, Web Scraping.

CERTIFICATION

The Ultimate Django Series - Code with Mosh

📅 Jan 2024 – Mar 2024

Complete SQL Mastery - Code with Mosh

📅 Jan 2024 – Mar 2024

Complete Python Developer in 2023 - Zero to Mastery

📅 Oct 2023 – Nov 2023

Fundamentals of Digital Marketing - Google Digital Garage

📅 Aug 2022 – Aug 2022

PROJECTS

Online Store Application (Client Work)

🔗 https://github.com/RahatVortex98/All_Well

Django ecommerce project focused on providing a comprehensive online shopping platform

- Built a **Django eCommerce app** with **AJAX cart** and **PostgreSQL**, enabling product management and COD checkout.
- Designed **responsive UI** with **HTML, CSS, and Bootstrap 5**, improving cross-device experience.

HR-Management-System-HRMS

🔗 <https://github.com/RahatVortex98/HR-Management-System-HRMS->

Comprehensive system for automating core HR operations and enhancing employee management.

- Developed a full-stack HRMS using **Laravel/PHP** and a **MySQL** database, implementing role-based access control (**RBAC**) and **CRUD** operations for personnel **data, leave, and payroll**.
- Designed a dynamic **admin dashboard** and employee self-service portal using **Blade** and **Bootstrap**, **streamlining** the submission and real-time tracking of leave requests and attendance records.

MedConnect

🔗 <https://github.com/RahatVortex98/MedConnect>

One-Health Appointment & Consultation Platform

- Developed a full-stack healthcare appointment and consultation platform in **Laravel/PHP** with a **MySQL** backend, enabling secure patient management and Doctor profile **CRUD** operations via an **RBAC**-secured Admin Dashboard.
- Designed the responsive user-facing portal (**Blade/HTML/CSS/WOW.js**) for dynamic appointment submission, and streamlined operational efficiency by integrating real-time request status management (Approve/Cancel) into the dashboard.

FlexWear – Full-Stack E-Commerce

🔗 <https://flexwear-shop.onrender.com/>

Laravel ecommerce project focused on providing a comprehensive online shopping platform,

- Developed a high-performance e-commerce platform with **Laravel 12** and **PHP 8.2**, featuring a complex product variant system (sizes/stock) and a dynamic shopping cart. Engineered a normalized **PostgreSQL** schema on **Render**, enforcing strict data integrity constraints and resolving **SQL** check violations during migration. Fully containerized the application with Docker to ensure consistent deployment environments across cloud stages.
 - Secured the Admin Dashboard with Role-Based Access Control (**RBAC**) to manage product lifecycles and customer orders securely.
-
