SUMMARY

Backend Engineer specializing in **Python/Django** and **PHP/Laravel** stacks with a strong focus on architecting secure, high-performance **REST APIs**. Proven expertise in **API** optimization, **PostgreSQL**, **MySQL** query refinement, and **Docker** containerization. Skilled in deploying scalable systems on **AWS** and **Render**, with a commitment to writing clean, maintainable code for full-stack applications.

EXPERIENCE

Backend Developer, *Noetic IT* 10/2024 – 11/2025

- Develop and maintain web applications, add-ons, and modules using **PHP**, **Laravel**, and **JavaScript**.
- Customize features and implement client-specific requirements to enhance usability and performance.
- Collaborate with cross-functional teams using **Agile methodologies** to deliver projects on time.
- Use **Git** for version control and maintain clear documentation for ongoing projects.

Jr. Laravel Developer, *Himal Tech* 07/2023 – 08/2024
Remote

- Developed and enhanced features for Travel & Tourist Guide and Education Consultancy platforms
- Debugged and fixed web application issues to improve performance and user experience
- Redesigned and upgraded existing systems for better scalability and functionality

Web Developer, *PaperArt* 03/2022 – 04/2023

- Completed a comprehensive training program focused on full-stack web development.
- Gained expertise in **PHP**, including hands-on experience with the Laravel framework.
- Developed strong foundational skills in front-end technologies: **HTML**, **CSS**, and **JavaScript**.
- Proficient in database management using **MySQL**.

EDUCATION

Bachelor of Science in Computer Science & Engineering (CSE), 03/2018 – 11/2022
United International University (UIU)

Higher Secondary Certificate (HSC), *Dhaka Residential Model College* 01/2014 – 05/2016

SKILLS

Programming & Frameworks

PHP, Laravel, Python, Django, Django REST Framework, JavaScript, HTML, CSS

DevOps & Tools

Docker, Git, GitHub, Postman, Reder

Database & APIs

PostgreSQL, SQL, REST, JWT, OAuth

Other

Microsoft Office, Canva, Web Scraping

PROJECTS

Online Store Application (Client Work) [🔗](https://github.com/RahatVortex98/All_Well), https://github.com/RahatVortex98/All_Well

- Built a **Django** eCommerce app with **AJAX** cart and **PostgreSQL**, enabling product management and COD checkout.
- Designed responsive UI with **HTML**, **CSS**, and **Bootstrap 5**, improving cross-device experience.

HR-Management-System-HRMS [🔗](https://github.com/RahatVortex98/HR-Management-System-HRMS-), <https://github.com/RahatVortex98/HR-Management-System-HRMS->

- Developed a full-stack HRMS using **Laravel/PHP** and a **MySQL** database, implementing role-based access control (**RBAC**) and **CRUD** operations for personnel data, leave, and payroll.
- Designed a dynamic admin dashboard and an employee self-service portal using **Blade** and **Bootstrap**, streamlining leave request submission and real-time tracking of attendance records.

MedConnect [🔗](https://github.com/RahatVortex98/MedConnect), <https://github.com/RahatVortex98/MedConnect>

- Developed a full-stack healthcare appointment and consultation platform in **Laravel/PHP** with a **MySQL** backend, enabling secure patient management and Doctor profile **CRUD** operations via an **RBAC**-secured Admin Dashboard
- . Designed the responsive user-facing portal (**Blade/HTML/CSS/WOW.js**) for dynamic appointment submission, and streamlined operational efficiency by integrating real-time request status management (Approve/Cancel) into the dashboard.

FlexWear - Full-Stack E-Commerce [🔗](https://flexwear-shop.onrender.com/), <https://flexwear-shop.onrender.com/>

- Developed a high-performance e-commerce platform with **Laravel 12** and **PHP 8.2**, featuring a complex product variant system (sizes/stock) and a dynamic shopping cart.
- Engineered a normalized **PostgreSQL** schema on **Render**, enforcing strict data integrity constraints and resolving **SQL** check violations during migration.
- Fully containerized the application with **Docker** to ensure consistent deployment environments across cloud stages. Secured the Admin Dashboard with Role-Based Access Control (**RBAC**) to manage product lifecycles and customer orders securely.

CERTIFICATION

- The Ultimate Django Series - Code with Mosh
- Complete SQL Mastery Code with Mosh
- CompletePython Developer in 2023 - Zero to Mastery
- Fundamentals of Digital Marketing - Google Digital Garage
